

CONVERSION BETWEEN FIDE ELO and ECF Gradings (*)

With effect from 1st January 2014:

$$\text{ECF} \times 7.5 + 700 = \text{FIDE}$$

$$(\text{FIDE} - 700) / 7.5 = \text{ECF}$$

Be aware that the above formula is not used in ECF grading (save for the special case of Direct Members' foreign results). It is provided for the guidance of organisers, who may wish to use it for seeding or eligibility purposes.

Rif.: <http://ecfgrading.org.uk>

(*) In use in Inghilterra (ECF = English Chess Federation).
